Elevation: awaiting ceiling and lighting bar installation

Notes:

- The space pictured with a piano will be turned into a cupboard to store chairs, tables and the piano when no in use.
- Lighting bars and ceiling are still to be installed
- The ceiling is slanted, joining at the middle in a point. Therefore, the support beams for the roof are low on the sides of the space. Metal bars have been installed to prevent running into them.
- Windows run the length of the room allowing natural sunlight into the space
